### DETAILED ACTION

1. The request filed on 4/21/2006 for Continued Examination (RCE) under 37 CFR 1.114 based on parent Application No. 10/027,915 is acceptable and a RCE has been established. An action on the RCE follows.

### *Claim Rejections - 35 USC § 112*

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 47-50,52,53,56,57,59-61 and 71-85 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. In claims 47,56,71,78 and 83, the disclosure corresponding to elected species 1 of figures 1-4 and 11 does not describe the bending regions of the proximal circumferential member are connected to and **in phase** with the bending regions of the distal circumferential member as recited.

Art Unit: 3734

Claims 47,56,71,78 and 83 rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 47,56,71,78 and 83 are unclear from the applicant's drawing of figure 2 where the bending regions of the proximal circumferential member are connected to and **in phase** (**in phase** occurs at peak 46 and valley 60?) with the bending regions of the distal circumferential member. Clarification is requested.
